

## RIPCO Policy for Quality

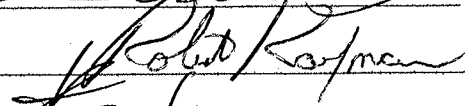

It is the intent of RIPCO to understand all relevant requirements to all customer inquiries. We will estimate, quote, manufacture and deliver all product in a timely manner with total customer satisfaction as final goal.

This Quality System developed for RIPCO is based on the requirements of ISO 9001:2000. The system allows for Internal Review and assesses the continued ability to meet our quality objectives. Regular Management Review meetings provide the framework for establishing, reviewing and revising these quality objectives. This quality policy and the RIPCO quality system are communicated to all employees and training is provided where, and as required to attain our quality objectives.

Terry Parsons, President

Bob Kaufman, V.P. Manufacturing

Mike Welsh, Manager, Q.A.
